Rachel,

Per your request, we are sharing with you our comments on the public records that you provided to us relating to EPA's investigation of other potentially responsible parties at the Yosemite Slough Superfund site. Also attached is a useful fact sheet regarding PCBs published by the Oregon Department of Environmental Quality. We look forward to meeting with you on December 4 and discussing the entities and properties considered by EPA, as well as the appropriate standard for the issuance of additional GNLs at this site.

Best regards,

Nico
